Paris Pattern No. 1898.
All Seams Allowed.
There is no diminution in the popularity of the sailor suit for girls and this latest development in white and Delifeblue linea is one of the best and jauntiest designs that is obtainable for the season of 1907. Made in white mohair with white taffetas bands or a white sik head trimming it would also be a dainty and attractive little Summer freek.

The pattern is in 4 sizes—6 to 12 years. For a girl of 10 years, the suit needs 0 % yards of material 27 inches wide, or 4% yards 26 inches wide, or 8% yards 42 inches wide; 6 yards 0 wide brad to trim.

Dr. Whitfield's Talk.

Dr. James M. Whitheld addressed the Woman's Club yesterday afternoon in a very delightful manner, his subject being "Some Interesting Facts About

Glass."

Dr. Whitfield is a practical chemist, as well as an attractive lecturer, Before an audience that was theroughly interested in learning of some important facts about a substance which contributes so largely to man's pleasure and comfort, he told the history of glass and described its manufacture. Dr. Whitfield exhibited specimens of several kinds of glass and used them effectively to lilustrate his lecture.

That Brings You Astonishing Values.

Astonishing is the only word that fitly describes the values you can get here Tuesday. No need to tell you that these goods have advanced considerably in cost during the past few months. Everyone knows that prices are higher-much higher. But even at last year's prices these values would still be unusual. As it is, they are simply wonderful, and you'll do well to provide for your immediate ruture wants. You'll certainly miss a great opportunity to save money if you fail to take advantage of this sale.

Riding Togs Yesterday.

Great difficulty is being experienced in securing a sufficient number of satisfactory horses for the ten mounted police officers in the suburban squad. Twelve horses will be required, one for each of the men, another for Chlef Werner, and still another for energency use or for the use of the sorgeant in charge of the squad.

Major Werner has succeeded in purchasing a nag that suits him, and was out yesterday in riding togs, which included a pair of leather leggins. Most of the men in the mounted squad are good horsemen aiready, and the other will have ample practice as soon as their mounts are purchased.

## ILLIG REINSTATED.

Suspension Was Due Entirely to Insubordination.

Insubordination.

Mayor McCarthy yesterday reinstated Poundmasier Carl Illig after a suspension of about a week. In doing so he made it clear that the suspension was due to Mr. Illig's insubordination and not to any fault with his discharge of his duttes. One of the afternoon papers printed a svory about the alleged unlawful detention of a dog beinging to a citizen who desired to redeem the canine. It is declared to be incorrect that Mr. Illig endeavored to overcharge. He merely carried out the ordinance relative to costs and penalty.

Quick Disposition of Appeal Cases of Five of Alleged Violators of Umlauf Law. In the Hustings Court yesterday five

of the appeal cases from the Police Court, wherein the defendants are charged with violating the Umlant law were tried and verdicts of "not guilty" were returned in each after brief consideration. Judge Witt's instructions to the jury are regarded as clear and fair.

One of the defendants, G. E. Delarue, was defended by Attorney Harry C Glenn, and the other four, P. Thomas Hunt, W. T. Smith, J. G. Smith and J. T. Anderson, Jr., were represented by Attorney Gilbert K. Pollock.

The jury which tried the cases was composed as follows, save that Mr. W. B. Pizzini was a juror in one case and not in the others: W. J. Quigley, Allen M. Lyon, T. E. Gill, John A. Meanly, J. W. Gibbons, E. A. Hill and William Jenkins, Jr.

City Attorney Henry R. Poliard appeared for the city and prosecuted the defendants. There was little or no

defendants. There was little or no argument on either side, the cyldence argument on either suc, the cyldence making clear that the defendants had been in the habit of closing before inidight and that they agglected the precaution of removing the screens and obstructions under the impression that the ordinance only applied to

Temperature at Long Distance.

It was in the latter part of 1903 that Sir John Murray made a series of experiments to determine the temperature of Loch Ness. The thermometer was immersed to a depth of 200 feet, and the temperature was recorded on an instrument at a distance of 300 feet from the thermometer. The Aermometer was attached to a cable wound on a drum which was fixed to the deck of a beat moored in the loca, and the cable was conceed to the shore cable by an elaborated mercury cup.
